CHIORINO®
1906
Passion for belting

GROUP PROFILE

In 2026 our Group will celebrate a double anniversary: 120 years since its original founding and 50 years of activity in the production of light conveyor belts for internal material handling and industrial automation. Over the past half-century, we have structured and evolved into a global industrial group, controlling more than 20 companies and 40 fabrication plants across 5 continents. With the acquisition of SAFARI BELTING in Olathe, Kansas City (USA) in 2021, we added plastic modular belts to our traditional fabric conveyor belt production. The modular belts are a significant addition to our product offering, which is currently focused primarily on the American market. In 2024 we acquired ZILIGEN, a company based in Sakarya, Turkey, that produces PVC conveyor belts complementary to those manufactured in Biella. As a result, the Group now operates with 3 production sites and operational challenges have understandably increased. However, as a global industrial group, we are successfully overcoming them thanks to the exceptional commitment of our 1,100 employees, who, together with us, are dedicated to ensuring a successful future for our Group.

Gregorio Chiorino
Executive President

With the new Chiorino Group profile, we present a Company that is increasingly becoming a global benchmark in the lightweight belting, specifically in the sector of conveyor and process belts. Chiorino solutions are more and more playing a "mission-critical" role in numerous conveying applications connected to complex production systems and to the most advanced industrial processes. Our products and services stand out for their quality and innovation, for a widespread and continuously expanding global presence and for talented and motivated people. These are the cornerstones of a company that is in continuous evolution, able to positively embrace trends in automation and sustainability. Today, just as in the past, the Chiorino Group is preparing to face the challenges of growth and change with determination and passion.

Matteo Chiorino
CEO

Chiorino Group is a trusted partner for efficient, safe and sustainable lightweight belting solutions.

With a rich history of innovation and a strong focus on customer satisfaction, Chiorino leads the way in delivering state-of-the-art conveyor and power transmission belts that help industries succeed in a fast-paced and environmentally conscious world.

With a vast worldwide network, Chiorino is a global player, recognized for its innovation, quality, and commitment to providing advanced solutions for any market segment.

Chiorino is a leading lightweight belting manufacturer with a strong focus on Innovation & Sustainability to empower global industrial automation

HISTORICAL BACKGROUND

Chiorino was founded in 1906 in Biella by Lorenzo Chiorino as a tannery for the production of leather technical items and transmission belts. As leather was gradually replaced by petroleum-derived materials, Chiorino began producing synthetic conveyor and transmission belts. Chiorino then embarked on international expansion, market development & diversification. Today it operates through 24 companies, 40+ fabrication plants & 1.100+ employees worldwide.

MISSION

We strive to be the reference company in the lightweight belting for reliable, engineered and tailor-made products and services that enable our customers to find the best solutions for their motion and automated conveyance needs.

VISION

We believe in the positive evolution of production and processing towards a more automated, digitalized, ethical and sustainable world.

VALUES

INNOVATION

Research & innovation have always been crucial assets of the Group, enabling Chiorino to evolve according to the increasingly demanding targets and anticipating technological advancements in all industries.

PEOPLE

People are Chiorino's biggest asset. Their professional expertise, dedication and work ethic are the pillars of past achievements and the key to accomplish Chiorino's mission and vision.

QUALITY

Chiorino's entrepreneurial choices have always been driven by a commitment to total quality. Specialized know-how and expertise inspire the Group to develop innovative and sustainable belting solutions.

SAFETY

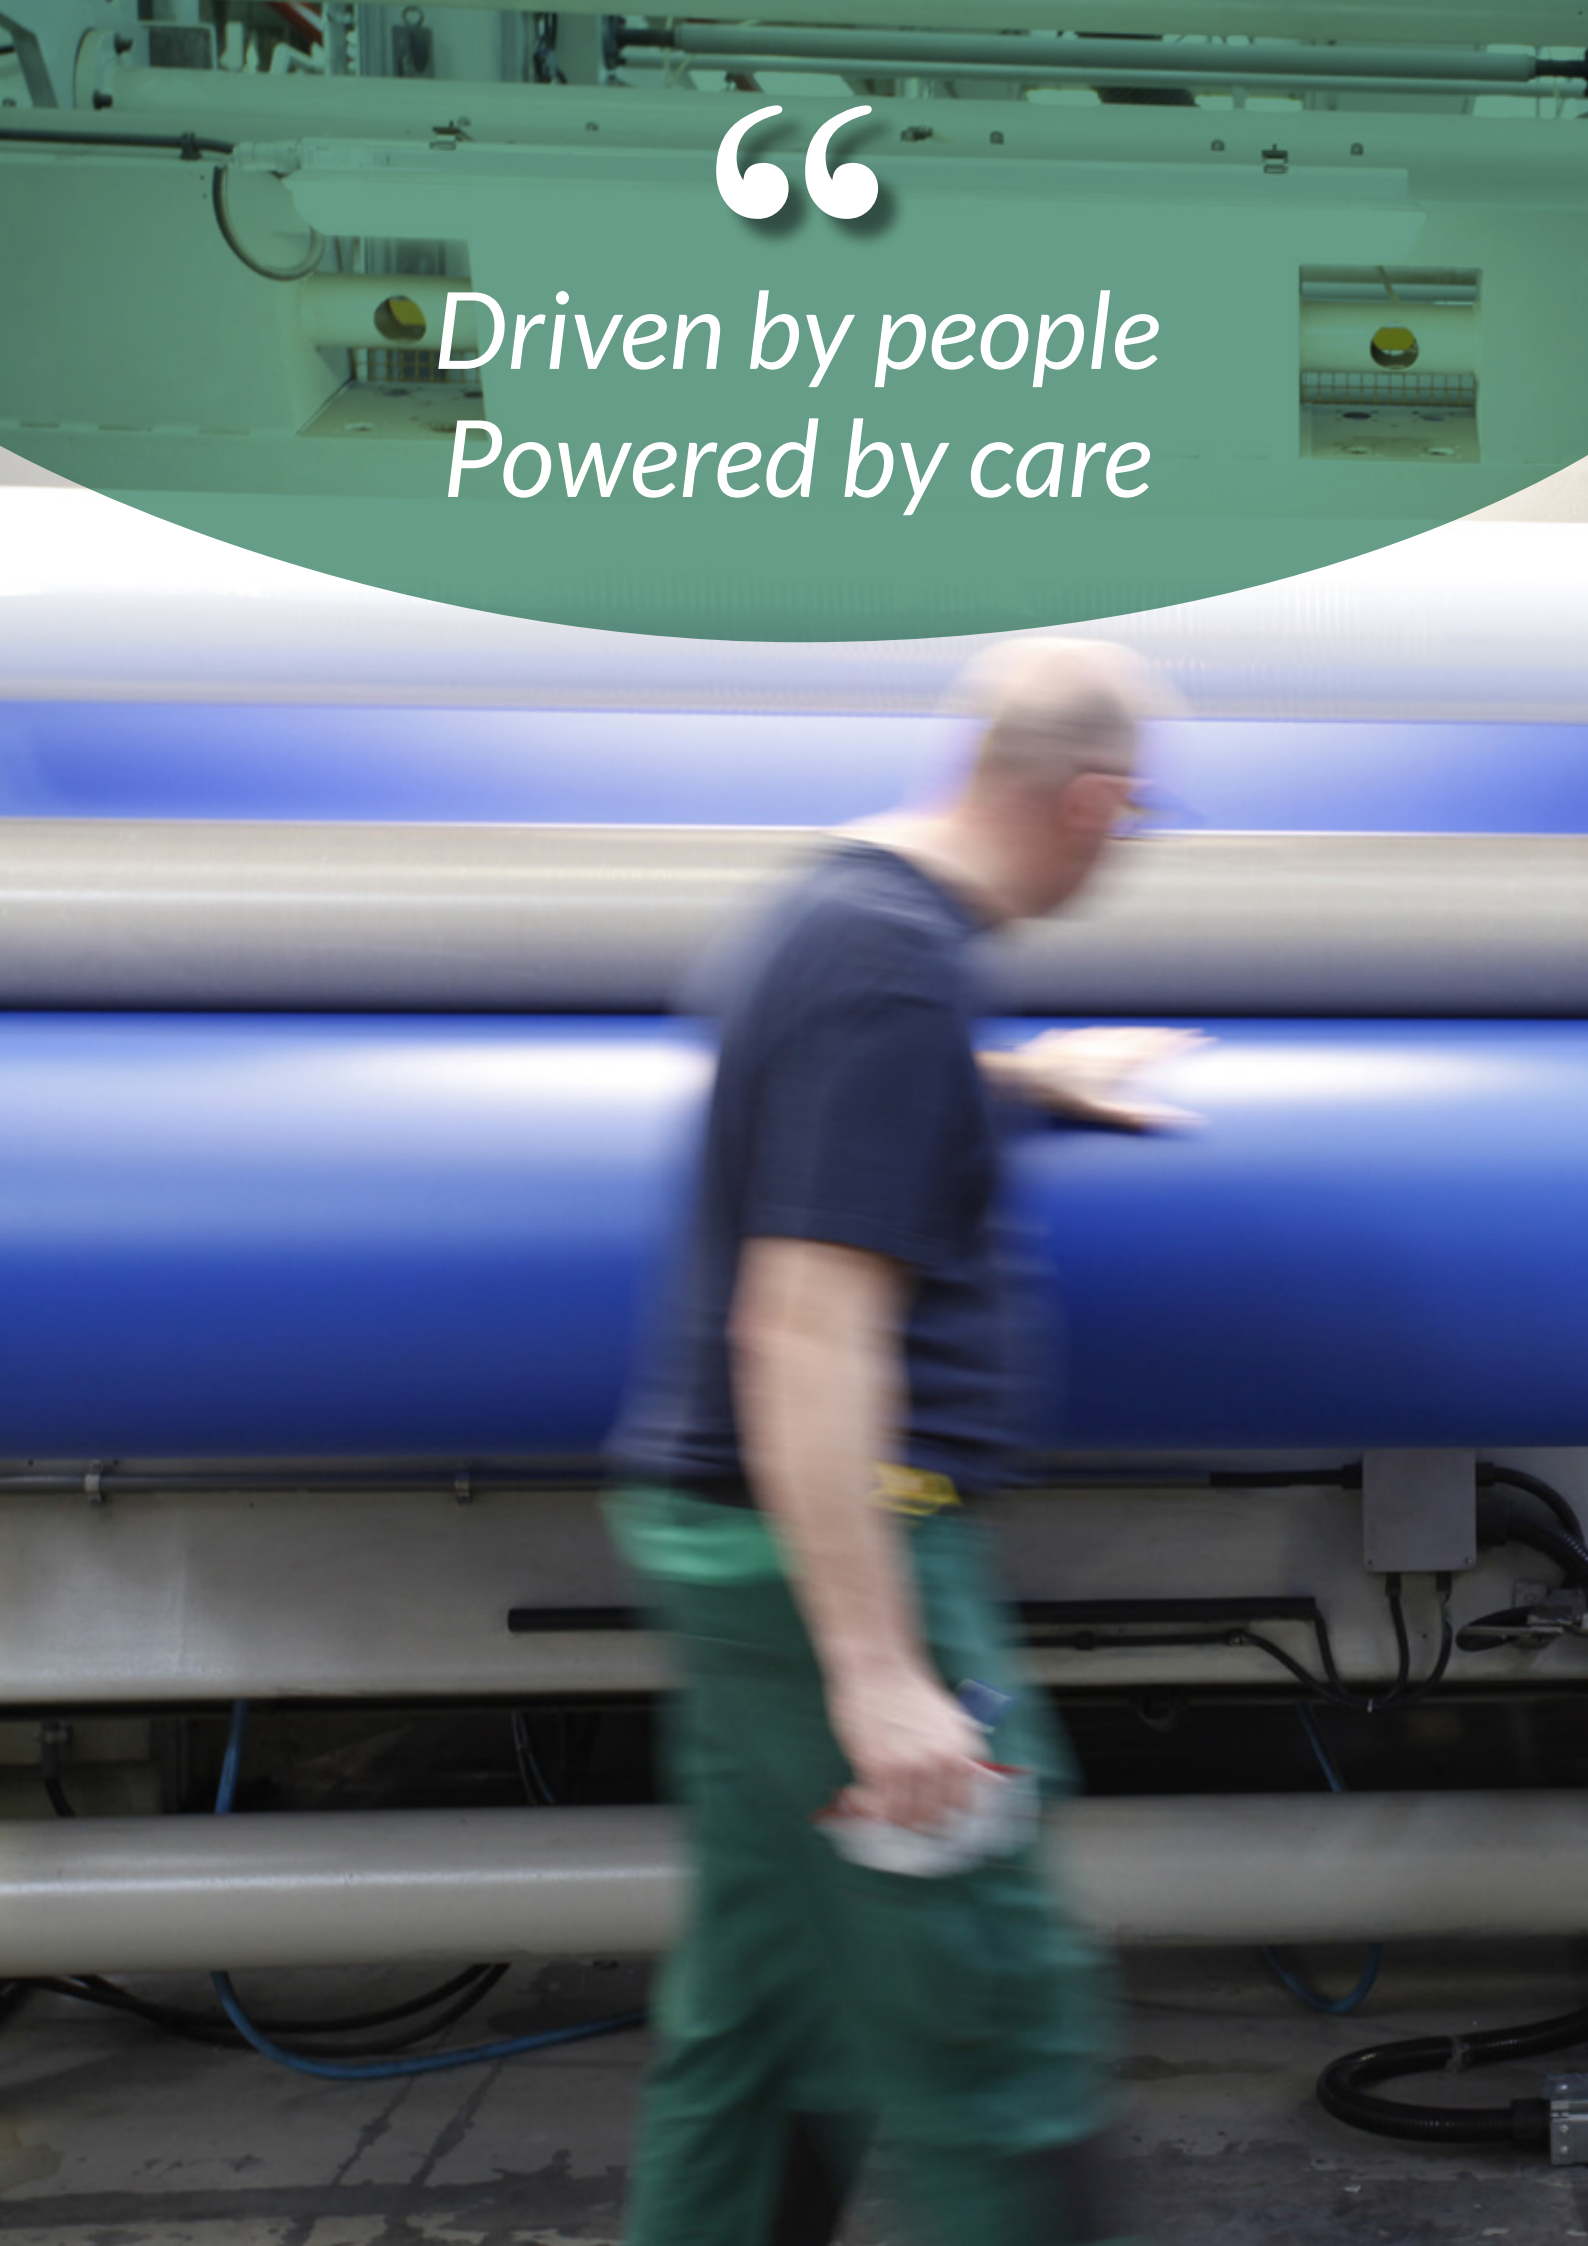

Chiorino's safety approach focuses on risk prevention, compliance with European & international standards and ongoing training. Integrating safety into product design and operations ensures a secure environment for employees and customers.

SERVICE

Chiorino is a global & local partner with a customer-focused network. The Group offers tailored belting solutions, quick deliveries, and 24/7 on-site technical assistance, delivering excellence and value wherever you are.

SUSTAINABILITY

Chiorino promotes a scientific and technological approach that respects people and the environment, reduces impact, accelerates the transition to clean energy and safeguards natural resources.

Driven by people
Powered by care

STATE-OF-THE-ART TECHNOLOGY

From calendering & coating to lamination, injection & extrusion, Chiorino's advanced, highly integrated production technologies enable customized solutions, ensuring full control and fast development of complex and highly specialized applications.

PIONEERING R&D

Research & Development is at the heart of belting innovation. Collaborating with universities and scientific centres, Chiorino R&D develops advanced technological solutions, sustainable materials and efficient custom designs, in compliance with international regulations.

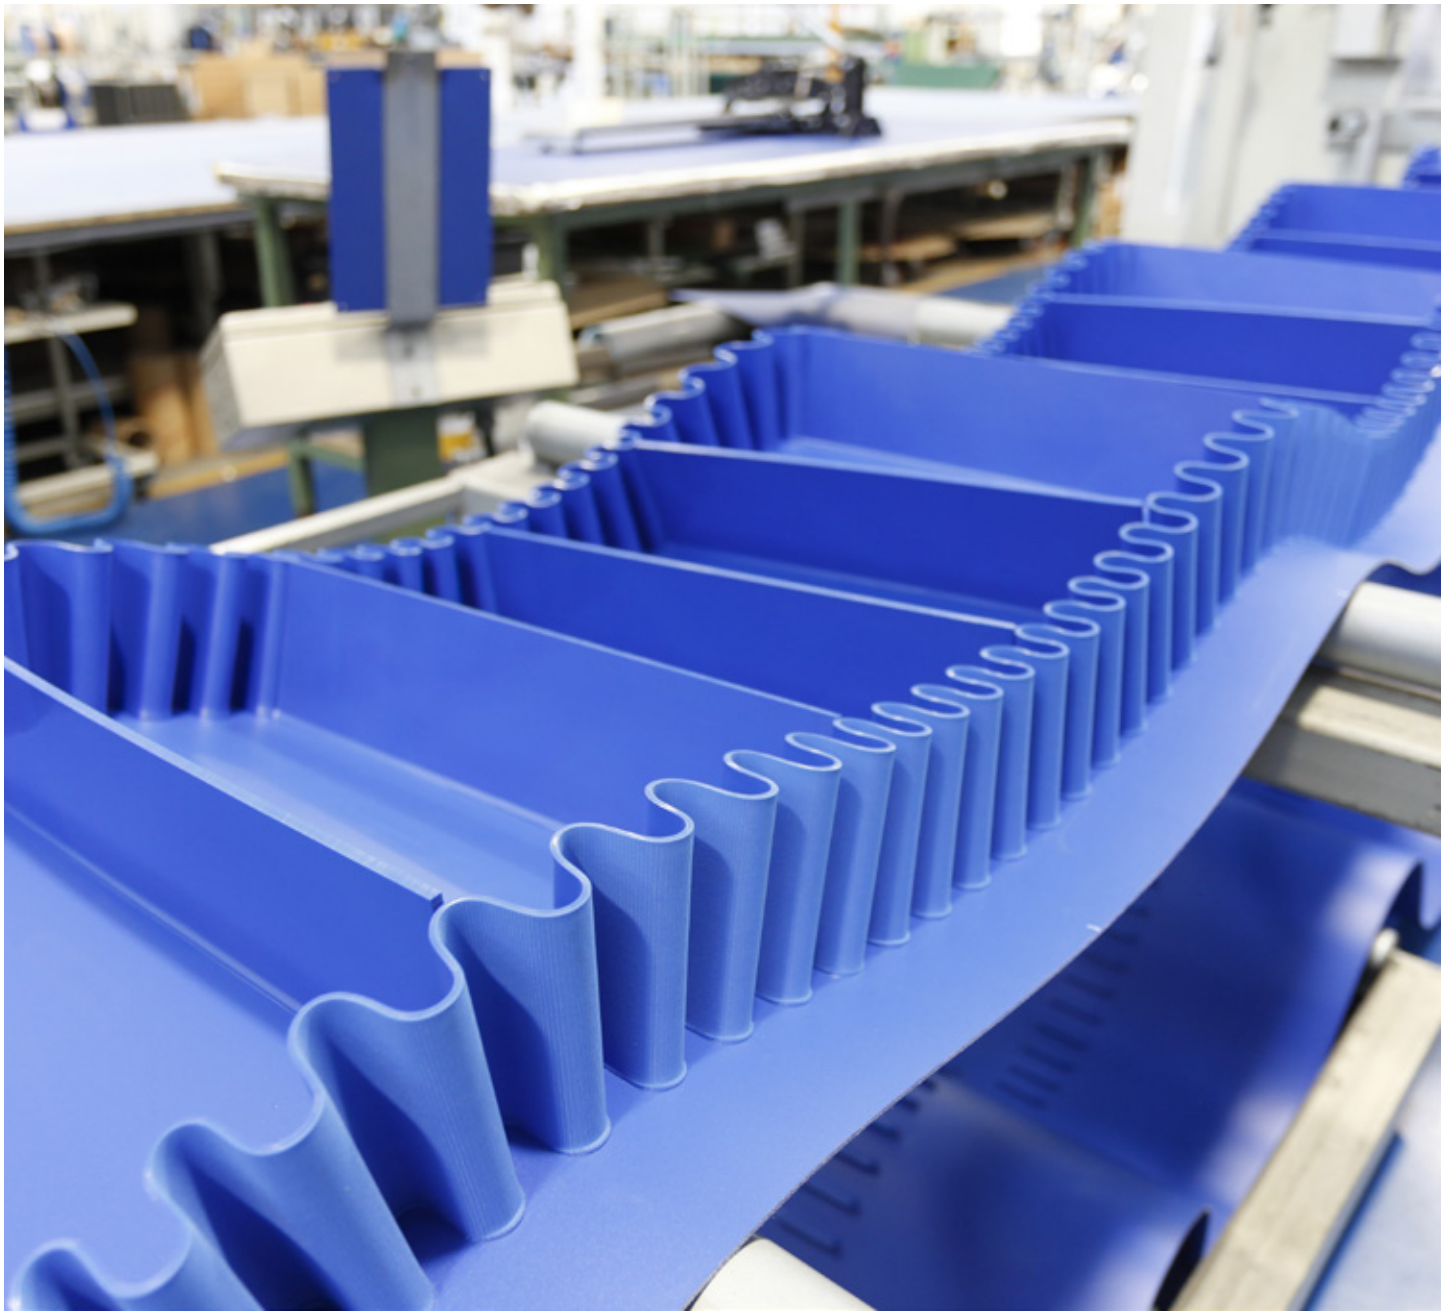

GLOBAL TOTAL QUALITY

Thanks to advanced equipment and skilled engineers, all global fabrication plants maintain strict standards, ensuring consistent, high-quality products and technical support, delivering tailor-made and reliable solutions to diverse customer's needs.

HYPER-CUSTOMIZATION

Leveraging advanced materials, unique in-house technologies and deep industry expertise, Chiorino is strongly committed to providing customized belting solutions, in collaboration with OEMs and End Users, from design to installation.

ESG COMMITMENT

Chiorino is deeply committed to ESG through environmental care, social responsibility and ethical governance. From sustainable materials and energy-efficient processes to employees' well-being, Chiorino actively invests in innovation to support a greener future and responsible growth.

ENVIRONMENT

Leading scientific and technological development to protect the environment and safeguard natural resources.

SOCIETY

Promoting respect for workers, inclusion, integration and equal opportunities against all forms of discrimination.

GOVERNANCE

Ethics, solidarity and sustainability guide Chiorino on a daily basis in the performance of business activities.

PRODUCTS

Chiorino manufactures innovative, high-performance belting solutions for diverse industries, enhancing productivity, safety, and efficiency with sustainable, customized products.

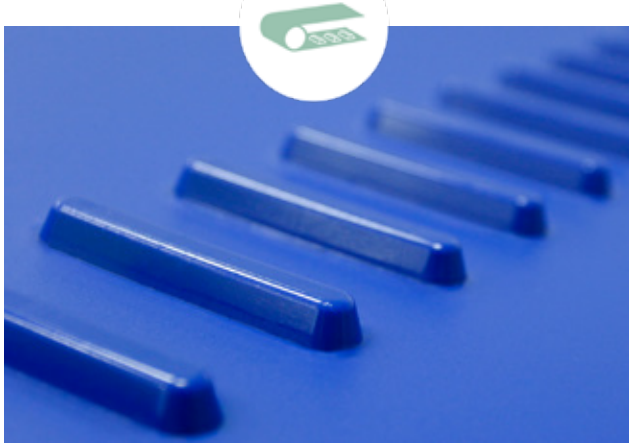

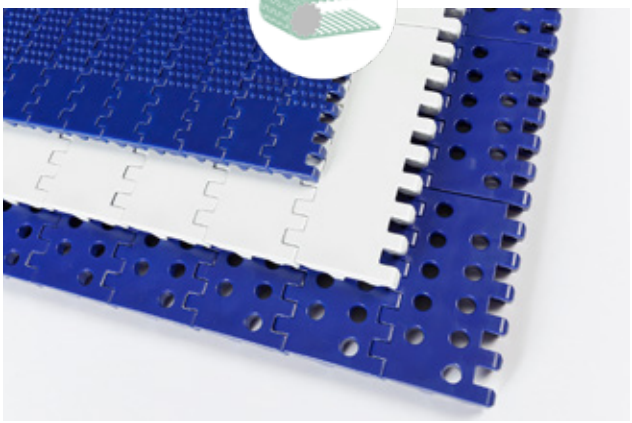

Conveyor & process belts

Engineered from advanced thermo-plastic and elastomeric materials, they ensure high performance, energy saving, durability, hygienic properties and easy maintenance.

Homogeneous & drive belts

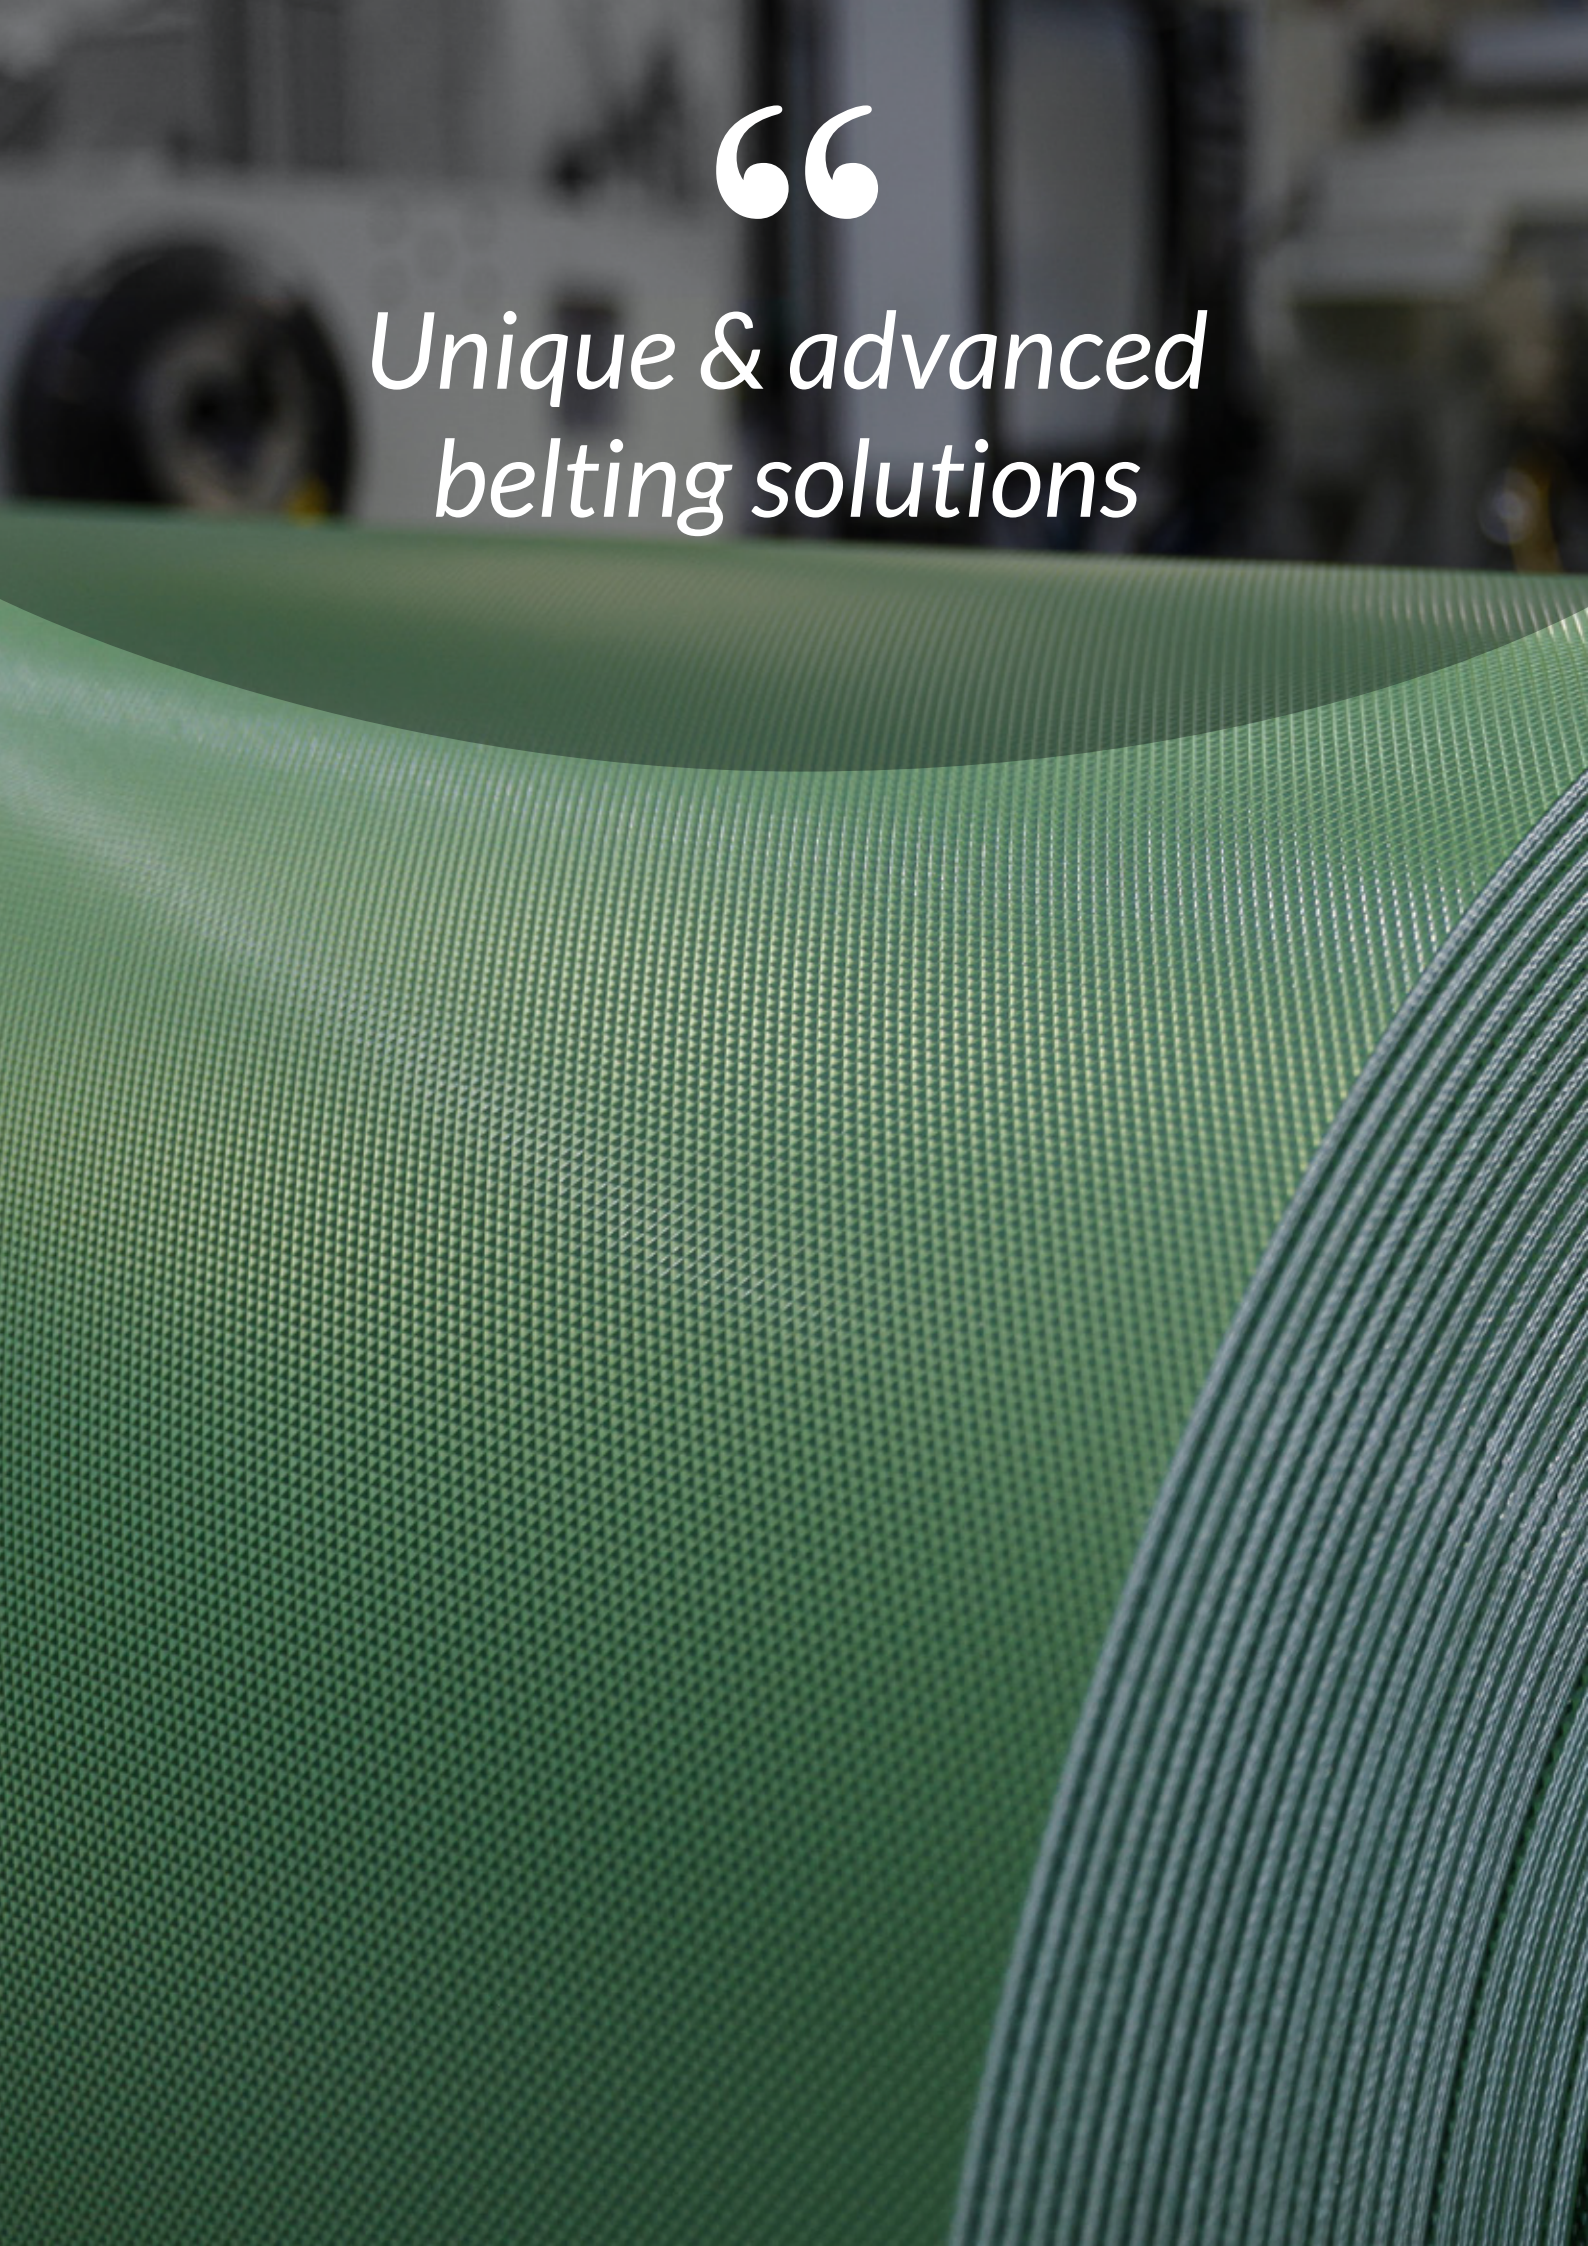

They deliver precise and trouble-free conveying with synchronized motion. Ideal for hygiene-critical and heavy-duty applications, they ensure easy cleaning and reduced maintenance.

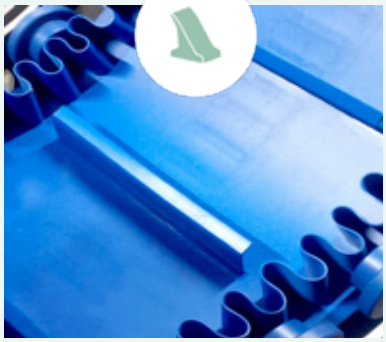

Plastic modular belts

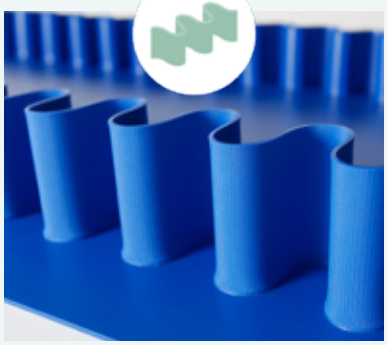

Safari Belting Systems manufactures robust, hygienic and customizable plastic modular belting solutions from unique polymers that provide excellent durability and easy cleaning.

“
Unique & advanced
belting solutions

Round & V-belts

Guides, Profiles, Sidewalls

The wide range of Chiorino polyurethane extruded accessories can meet customized conveying designs, enhancing belt tracking, precise containment, and gentle product handling.

Machine tapes

Chiorino machine tapes ensure smooth operations, low noise, durability and excellent performance at high speeds. Quickly installed on-site, they increase efficiency and reduce maintenance operations.

Power transmission belts

Chiorino power transmission belts are designed to reduce energy consumption and maintenance operations, even in the fastest machines, ensuring reliability, safety and long service life.

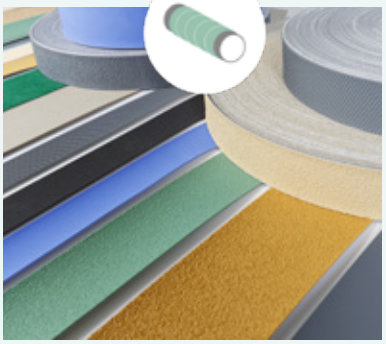

Seamless belts

Elastomer and silicone sheeting

Texgum roller coverings

Made from unique premium elastomers, seamless belts, sheeting and roller coverings integrate the technical Chiorino portfolio to cover all industrial applications.

Timing belts

Chiorino Poland is specialized in timing belts ideal for customized synchronous power transmission. Supplied endless or open-end with custom profiles and textures, they ensure low maintenance and durability, enhancing performances.

the world around you

INDUSTRIES

Deep expertise and market knowledge allow Chiorino to deliver innovative solutions for any industry, safeguarding the environment and optimizing customers' total cost of ownership.

Food

Hygienic belting solutions that ensure total safety in compliance with the strictest international standards. Easy to clean and water saving, Chiorino food belts enhance HACCP & Sustainability in all food processing.

Packaging

Chiorino custom-engineered solutions boost efficiency, reduce downtime, support automation and meet safety and food-grade standards across diverse packaging applications.

Paper & Printing

Designed for high-speed operations, they ensure accurate sheet transport, precise printing, and efficient folding. Premium elastomers offer superior grip, excellent abrasion and chemical resistance, increasing efficiency and reducing downtime.

Intralogistics

Airports

Chiorino offers energy-efficient, durable and flame retardant belting solutions for airports and intralogistics, reducing energy consumption, maintenance costs, and enhancing operational efficiency in high-speed applications.

Textile

Advanced belting solutions for the textile industry, ensuring reliable performance in spinning, weaving and finishing processes, reducing energy consumption, enabling the gentle handling of delicate fibres and fabrics.

Wood & Raw materials

Robust, durable belting solutions with excellent resistance to abrasion, impacts and oils, ideal for conveying rough or heavy materials, optimizing productivity even in highly demanding processes.

Recycling

Lightweight thermoplastic belts supporting the circular economy with lower maintenance costs and energy efficiency.

Sports

Fitness belts delivering energy savings, silent operation, runner safety and premium performance and durability.
